CAREER OBJECTIVE

To work in an environment that provides a challenging and rewarding career which ensures high levels of job satisfaction and to be an ef ective and contributor towards organizational goals.

Experience Summary

- Working as Server Administrator and Node Js Developer in **NerdPine solutions** from February 2022 to till date
- Having 1.5 Years of experience as a Node Js Developer which includes working with Node.js frameworks such as Express Js, building RESTful APIs, working with databases (such as **MongoDB**), and implementing authentication and authorization using libraries like Passport, JSON Web Token (JWT) .
- Worked on Development and deployment using **Express.js**, **Git**, **GitHub**, and **Docker**.
- Skilled in Docker,Git, GitHub, Shell Scripting, **AWS (EC2 , S3)**

Skills

- **Programming** : Node Js
- **Web Technologies:** Node.js, Express.js, RESTful APIs
- **Tools :** npm, Postman
- **Containerization** : Docker
- **Version control tools** : Git, GitHub
- **Scripting** : Shell Scripting
- **Web Servers** : Nginx, Apache Tomcat
- **Cloud Technologies** : AWS (EC2, S3)
- **Networking** : TCP/IP, SCP, LAN/WAN,DNS, HTTP, FTP, SSH
- **Operating Systems** : Windows XP/7/8/10/11, Unix/Linux
- **Database** : Mongodb

PERSONALITY TRAITS

- Ability to prioritize
- Team work
- Ability to stay calm under pressure
- patience

Projects

Project #1

Title — Verification process

Report Automation

Description

The DataFlow Group is a pioneering global provider of specialized Primary Source Verification (PSV) solutions, and background screening and immigration compliance services that assist public and private organizations in mitigating risks to make informed, cost-effective decisions regarding their applicants and registrants. They are partners with clients across the public and private sectors to assist them in mitigating potential risks by exposing fraudulent education degrees, job histories, practice licenses, work permits and passports, among other personal or professional documents.

Client — **DataFlow**

Period — **June 2022 to Feb 2023**

Roles & Responsibilities

- **Deploying Java application JAR code on Linux servers, setting up environments for JAR and WAR applications using technologies such as Git, Apache Tomcat Server, and Shell Scripting**
- **Creating a shell script to automate the scheduling of jobs and cleanup activities.**

Project #2

Title — RCE vulnerability

Ultr0nctf

Description

This CTF (Capture the Flag) challenge focuses on Remote Code Execution (RCE) vulnerabilities within a containerized environment and incorporates the use of Docker containerization and Nginx reverse proxy. Participants will engage in practical tasks and puzzles designed to enhance their understanding of RCE vulnerabilities and their exploitation. By simulating real-world scenarios, participants will gain hands-on experience in identifying and mitigating RCE vulnerabilities in Docker containers while also learning about the role of Nginx reverse proxy in securing applications.

Client — **TryHackMe**

Period — **Feb 2022 to May 2022**

Roles & Responsibilities

- **Developing build deployment using Nginx reverse proxy, Node.js, Docker, and an application while setting up the environment for automation processes. Fully handling build and deployment using Git and Docker.**
- **Set up Node.js and Dockerize the application using a Dockerfile for containerization.**
- **Utilize Nginx as a reverse proxy to handle incoming requests and forward them to the backend server.**
- **Automate the build and deployment process using Git integration and CI/CD tools like Jenkins or GitHub Actions.**

Achievements, Labs & Certification

- Advent of Cyber in 2020 from TryHackMe Academy, won a Raspberry Pi 400 as part of the Advent of Cyber challenge
- CEH (Certified Ethical Hacking) certification in 2021 from OneByteLabs
- Advent of Cyber 3 in 2021 from TryHackMe Academy
- TryHackMe cyber security certifications achieved in 2021-2022, including :
  - Web Fundamentals , Introduction to Cyber Security, Jr. Penetration Tester, Pre Security, Cyber Defense, Complete Beginner, Offensive Pentesting, CompTIA Pentest+ certification .

Education

- I completed a B.Sc. in Computer Science (MPCS) from Adarsh Degree College, Andhra University, graduating in 2021.
- I successfully completed the MPC (Mathematics, Physics, Chemistry) course in intermediate at Sri Chaitanya Junior College
